ELSEVIER

Wear 186–187 (1995) 581–586

WEAR

Subject Index of Volumes 186–187

Abrasion
grain-size dependence of the wear of alumina, 45
Abrasion–corrosion
abrasion–corrosion studies of passive stainless steels in acidic media: combination of acoustic emission and electrochemical techniques, 533
Abrasive particles
some reflections on the past and future of erosion, 1
Acid
the synergistic effect between erosion and corrosion in acidic slurry medium, 555
the influence of applied potential on the erosion–corrosion behavior of AISI321 stainless steel in acidic slurry medium, 568
Acoustic emission
abrasion–corrosion studies of passive stainless steels in acidic media: combination of acoustic emission and electrochemical techniques, 533
Aerospace
waterdrop impact modeling, 341
a discussion of rain erosion testing at the United States Air Force rain erosion test facility, 384
Alloys
the solid particle and cavitation erosion of titanium aluminide intermetallic alloys, 123
the erosion–corrosion of alloys under oxidizing–sulphidizing conditions at high temperature, 291
Alumina
grain-size dependence of the wear of alumina, 45
the effects of angle of impact and material properties on the erosion rates of ceramics, 117
Aluminides
the solid particle and cavitation erosion of titanium aluminide intermetallic alloys, 123
Aluminium
the influence of corrosion on the erosion of aluminium by aqueous silica slurries, 515
erosion–corrosion damage of aluminum alloy in a high-speed, high-temperature, two-phase flow, 573
Angle of impact
the effects of angle of impact and material properties on the erosion rates of ceramics, 117
Applied potential
the influence of applied potential on the erosion–corrosion behavior of AISI321 stainless steel in acidic slurry medium, 568
Aqueous environments
identification of transitions in erosion–corrosion regimes in aqueous environments, 523

Boiler tubes
the design of an apparatus to test wear of boiler tubes, 266

Brittle solids
impact fracture thresholds in brittle solids, 99
a study of the mechanisms of erosion in silicon single crystals using Hertzian fracture tests, 105
Brunton device
thirty years of liquid impact research: a tutorial review, 28
Bubble collapse pressure
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437

Cast iron
wear of hardfacing white cast irons by solid particle erosion, 150
Cavitation
the solid particle and cavitation erosion of titanium aluminide intermetallic alloys, 123
liquid-jet impact on liquid and solid surfaces, 388
a study of pressures and erosion produced by collapsing cavitation, 425
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437
classification of lubricants according to cavitation criteria, 444
influence of galvanic macro-cell corrosion on the cavitation erosion durability assessment of metallic materials International cavitation erosion test of Gdańsk, 542
erosion–corrosion tests on copper alloys for water tap use, 548
Centripetal effect accelerator erosion tester
comparisons between "sand blast" and "centripetal effect accelerator" type erosion testers, 168
Ceramic coatings
slurry erosion properties of ceramic coatings and functionally gradient materials, 473
Ceramics
the effects of angle of impact and material properties on the erosion rates of ceramics, 117
erosion testing of refractories—a new testing procedure, 215
Cermets
slurry erosion behaviour of thermally sprayed WC–M coatings, 480
Choke valves
sand erosion of wear-resistant materials: Erosion in choke valves, 179
erosion in choke valves—oil and gas industry applications, 401
Cleaning
investigation of erosion processes as cleaning mechanisms in the removal of thin deposited soils, 413
Coal combustion
practical experience with wastage at elevated temperatures in coal combustion systems, 11
erosion–corrosion of carbon steel by products of coal combustion, 256

Elsevier Science S.A.

Coal-fired power generation
erosion–corrosion modelling of gas turbine materials for coal-fired combined cycle power generation, 247
Coatings
the influence of substrate material on the erosion resistance of TiN coated tool steels, 189
new parameters in erosion for study of bulk materials and coatings, 210
high-temperature erosion resistance of coatings for use in turbomachinery, 224
coatings and surface treatments for protection against low-velocity erosion–corrosion in fluidized beds, 238
slurry erosion behaviour of thermally sprayed WC–M coatings, 480
Computer graphics
interpretation of wastage mechanisms of materials exposed to elevated temperature erosion–corrosion using erosion–corrosion maps and computer graphics, 273
Copper
a comparison of particle impact in gas–solid and liquid–solid erosion, 465
Copper alloys
erosion–corrosion tests on copper alloys for water tap use, 548
Corrosion
practical experience with wastage at elevated temperatures in coal combustion systems, 11
the development of surface features on nickel during erosion–corrosion, 56
coatings and surface treatments for protection against low-velocity erosion–corrosion in fluidized beds, 238
erosion–corrosion modelling of gas turbine materials for coal-fired combined cycle power generation, 247
erosion–corrosion of carbon steel by products of coal combustion, 256
interpretation of wastage mechanisms of materials exposed to elevated temperature erosion–corrosion using erosion–corrosion maps and computer graphics, 273
the erosion–corrosion of alloys under oxidizing–sulphidizing conditions at high temperature, 291
erosion–corrosion of mild steel in a temperature gradient, 316
erosion–corrosion of Ti–6Al–4V in elevated temperature air environment, 332
combating severe fluid erosion and corrosion of drill bits using thermal spray coatings, 487
erosion of material used in petroleum production, 493
a study of the erosion–corrosion behaviour of engineering steels for marine pumping applications, 497
erosion and corrosion properties of WC coatings and duplex stainless steel in sand-containing synthetic sea water, 508
the influence of corrosion on the erosion of aluminium by aqueous silica slurries, 515
identification of transitions in erosion–corrosion regimes in aqueous environments, 523
influence of galvanic macro-cell corrosion on the cavitation erosion durability assessment of metallic materials International cavitation erosion test of Gdańsk, 542
erosion–corrosion tests on copper alloys for water tap use, 548
the synergistic effect between erosion and corrosion in acidic slurry medium, 555
depassivation and repassivation of AISI321 stainless steel surface during solid particle impact in 10% H_2SO_4 solution, 562
the influence of applied potential on the erosion–corrosion behavior of AISI321 stainless steel in acidic slurry medium, 568
erosion–corrosion damage of aluminum alloy in a high-speed, high-temperature, two-phase flow, 573
Cracks
grain-size dependence of the wear of alumina, 45
impact fracture thresholds in brittle solids, 99

Diamond
erosion in choke valves—oil and gas industry applications, 401
Diamond composites
solid particle erosion of IR-transmitting materials and diamond composites, 195
Dicalcium phosphate
erosion of 316 stainless steel by dicalcium phosphate, 145
Dislocation
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437
Drill bits
combating severe fluid erosion and corrosion of drill bits using thermal spray coatings, 487
Ductile–brittle transition
some reflections on the past and future of erosion, 1
Durability
influence of galvanic macro-cell corrosion on the cavitation erosion durability assessment of metallic materials International cavitation erosion test of Gdańsk, 542

Erosion
some reflections on the past and future of erosion, 1
practical experience with wastage at elevated temperatures in coal combustion systems, 11
particulate impact damage predictions, 35
the development of surface features on nickel during erosion–corrosion, 56
Monte Carlo modelling of erosion processes, 64
visualization of surface waves propagating over surfaces eroded due to particle impact, 78
plastic ratchetting as a mechanism of erosive wear, 86
a study of solid particle failure under normal and oblique impact, 92
a study of the mechanisms of erosion in silicon single crystals using Hertzian fracture tests, 105
the effects of angle of impact and material properties on the erosion rates of ceramics, 117
the solid particle and cavitation erosion of titanium aluminide intermetallic alloys, 123
the solid particle erosion of metallic materials: The rationalization of the influence of material variables, 129
erosion of 316 stainless steel by dicalcium phosphate, 145
wear of hardfacing white cast irons by solid particle erosion, 150
erosion resistance of permanent moulded high chromium iron, 159
sand erosion of wear-resistant materials: Erosion in choke valves, 179
the influence of substrate material on the erosion resistance of TiN coated tool steels, 189
solid particle erosion of IR-transmitting materials and diamond composites, 195
new parameters in erosion for study of bulk materials and coatings, 210
erosion testing of refractories—a new testing procedure, 215
a generalized description of the simultaneous processes of scale growth by high-temperature oxidation and removal by erosive impact, 230
coatings and surface treatments for protection against low-velocity erosion–corrosion in fluidized beds, 238

erosion–corrosion modelling of gas turbine materials for coal-fired combined cycle power generation, 247
erosion–corrosion of carbon steel by products of coal combustion, 256
the design of an apparatus to test wear of boiler tubes, 266
interpretation of wastage mechanisms of materials exposed to elevated temperature erosion–corrosion using erosion–orrosion maps and computer graphics, 273
modelling the influence of surface oxidation on high temperature erosion, 284
the erosion–corrosion of alloys under oxidizing–sulphidizing conditions at high temperature, 291
high-temperature erosion of Haynes and Waspaloy: effect of temperature and erosion mechanisms, 299
wastage of low alloy steels in a fluidized bed environment, 306
erosion–corrosion of mild steel in a temperature gradient, 316
the circumferential distribution of wastage on in-bed tubes in fluidized bed combustors, 325
erosion–corrosion of Ti–6Al–4V in elevated temperature air environment, 332
waterdrop impact modeling, 341
water droplet erosion of laser surface treated Ti–6Al–4V, 360
water droplet erosion and microstructure of laser-nitrided Ti–6Al–4V, 368
the liquid impact resistance of a range of IR-transparent materials, 375
a discussion of rain erosion testing at the United States Air Force rain erosion test facility, 384
liquid-jet impact on liquid and solid surfaces, 388
erosion behaviour and mechanisms for steam turbine rotor blades, 395
erosion in choke valves—oil and gas industry applications, 401
investigation of erosion processes as cleaning mechanisms in the removal of thin deposited soils, 413
a new model for steam turbine blade materials erosion, 421
a study of pressures and erosion produced by collapsing cavitation, 425
impact angle, particle energy and mass loss in erosion by dilute slurries, 454
a comparison of particle impact in gas–solid and liquid–solid erosion, 465
slurry erosion properties of ceramic coatings and functionally gradient materials, 473
slurry erosion behaviour of thermally sprayed WC–M coatings, 480
erosion of material used in petroleum production, 493
a study of the erosion–corrosion behaviour of engineering steels for marine pumping applications, 497
erosion and corrosion properties of WC coatings and duplex stainless steel in sand-containing synthetic sea water, 508
the influence of corrosion on the erosion of aluminium by aqueous silica slurries, 515
identification of transitions in erosion–corrosion regimes in aqueous environments, 523
influence of galvanic macro-cell corrosion on the cavitation erosion durability assessment of metallic materials International cavitation erosion test of Gdańsk, 542
erosion–corrosion tests on copper alloys for water tap use, 548
the synergistic effect between erosion and corrosion in acidic slurry medium, 555
depassivation and repassivation of AISI321 stainless steel surface during solid particle impact in 10% H_2SO_4 solution, 562
the influence of applied potential on the erosion–corrosion behavior of AISI321 stainless steel in acidic slurry medium, 568
erosion–corrosion damage of aluminum alloy in a high-speed, high-temperature, two-phase flow, 573

Erosion–corrosion maps
interpretation of wastage mechanisms of materials exposed to elevated temperature erosion–corrosion using erosion–corrosion maps and computer graphics, 273

Erosion–oxidation
a generalized description of the simultaneous processes of scale growth by high-temperature oxidation and removal by erosive impact, 230

Erosion resistance
high-temperature erosion resistance of coatings for use in turbomachinery, 224

Erosion testers
comparisons between "sand blast" and "centripetal effect accelerator" type erosion testers, 168

Etch pit
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437

Finite element model
waterdrop impact modeling, 341

Flaws
impact fracture thresholds in brittle solids, 99

Flow field
new parameters in erosion for study of bulk materials and coatings, 210

Fluid erosion
combating severe fluid erosion and corrosion of drill bits using thermal spray coatings, 487

Fluid flow
some reflections on the past and future of erosion, 1

Fluidised beds
erosion testing of refractories—a new testing procedure, 215

Fluidized bed
coatings and surface treatments for protection against low-velocity erosion–corrosion in fluidized beds, 238
wastage of low alloy steels in a fluidized bed environment, 306
the circumferential distribution of wastage on in-bed tubes in fluidized bed combustors, 325

Fly ash
practical experience with wastage at elevated temperatures in coal combustion systems, 11

Fracture
a study of solid particle failure under normal and oblique impact, 92
impact fracture threshclds in brittle solids, 99
a study of the mechanisms of erosion in silicon single crystals using Hertzian fracture tests, 105

Functionally gradient materials
slurry erosion properties of ceramic coatings and functionally gradient materials, 473

Galvanic corrosion
influence of galvanic macro-cell corrosion on the cavitation erosion durability assessment of metallic materials International cavitation erosion test of Gdańsk, 542

Gas turbines
erosion–corrosion modelling of gas turbine materials for coal-fired combined cycle power generation, 247

Grain size
grain-size dependence of the wear of alumina, 45

Guided acoustic waves
thirty years of liquid impact research: a tutorial review, 28

Hardfacing alloys
wear of hardfacing white cast irons by solid particle erosion, 150
Haynes
high-temperature erosion of Haynes and Waspaloy: effect of temperature and erosion mechanisms, 299
Heat exchangers
erosion–corrosion of mild steel in a temperature gradient, 316
the circumferential distribution of wastage on in-bed tubes in fluidized bed combustors, 325
Heat-resistant alloys
high-temperature erosion of Haynes and Waspaloy: effect of temperature and erosion mechanisms, 299
Hertzian fracture tests
a study of the mechanisms of erosion in silicon single crystals using Hertzian fracture tests, 105
High temperature
interpretation of wastage mechanisms of materials exposed to elevated temperature erosion–corrosion using erosion–corrosion maps and computer graphics, 273
the erosion–corrosion of alloys under oxidizing–sulphidizing conditions at high temperature, 291
high-temperature erosion of Haynes and Waspaloy: effect of temperature and erosion mechanisms, 299
erosion–corrosion of Ti–6Al–4V in elevated temperature air environment, 332
High-temperature oxidation
a generalized description of the simultaneous processes of scale growth by high-temperature oxidation and removal by erosive impact, 230
High temperature studies
modelling the influence of surface oxidation on high temperature erosion, 284
Hydraulic systems
classification of lubricants according to cavitation criteria, 444
Hypersonic velocity
the measurement of impact pressure and solid surface response in liquid–solid impact up to hypersonic range, 352

Impact angle
a study of solid particle failure under normal and oblique impact, 92
impact angle, particle energy and mass loss in erosion by dilute slurries, 454
Impact load
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437
Impact pressure
the measurement of impact pressure and solid surface response in liquid–solid impact up to hypersonic range, 352
Impact speed
a study of solid particle failure under normal and oblique impact, 92
Indentation
measurements of plastic strain below an indentation and piling-up between two adjacent indentations, 50
Iron
erosion resistance of permanent moulded high chromium iron, 159
IR-transmitting materials
solid particle erosion of IR-transmitting materials and diamond composites, 195
IR-transmitting windows
particulate impact damage predictions, 35
IR-transparent materials
the liquid impact resistance of a range of IR-transparent materials, 375

Jet erosion test
erosion resistance of permanent moulded high chromium iron, 159

Lasers
water droplet erosion and microstructure of laser-nitrided Ti–6Al–4V, 368
Laser surface treatment
water droplet erosion of laser surface treated Ti–6Al–4V, 360
Liquid impact
thirty years of liquid impact research: a tutorial review, 28
waterdrop impact modeling, 341
the liquid impact resistance of a range of IR-transparent materials, 375
Liquid-jet impact
liquid-jet impact on liquid and solid surfaces, 388
Liquid–solid impact
the measurement of impact pressure and solid surface response in liquid–solid impact up to hypersonic range, 352
Lubricants
classification of lubricants according to cavitation criteria, 444

Magnesium oxide single crystal
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437
Marine pumping
a study of the erosion–corrosion behaviour of engineering steels for marine pumping applications, 497
Material properties
the effects of angle of impact and material properties on the erosion rates of ceramics, 117
Mathematical models
impact angle, particle energy and mass loss in erosion by dilute slurries, 454
Metallic materials
the solid particle erosion of metallic materials: The rationalization of the influence of material variables, 129
Metals
influence of galvanic macro-cell corrosion on the cavitation erosion durability assessment of metallic materials International cavitation erosion test of Gdańsk, 542
Modeling
a generalized description of the simultaneous processes of scale growth by high-temperature oxidation and removal by erosive impact, 230
Monte Carlo method
modelling the influence of surface oxidation on high temperature erosion, 284
Monte Carlo modelling
Monte Carlo modelling of erosion processes, 64

Nickel
the development of surface features on nickel during erosion–corrosion, 56
Nitriding
water droplet erosion and microstructure of laser-nitrided Ti–6Al–4V, 368
Nuclear engineering
numerical prediction of erosion for suspension flow duct, 203
Numerical prediction
numerical prediction of erosion for suspension flow duct, 203

Oil and gas industry
erosion in choke valves—oil and gas industry applications, 401
Oil and gas production
sand erosion of wear-resistant materials: Erosion in choke valves, 179
Oxidation
modelling the influence of surface oxidation on high temperature erosion, 284
the erosion–corrosion of alloys under oxidizing–sulphidizing conditions at high temperature, 291
wastage of low alloy steels in a fluidized bed environment, 306
erosion–corrosion of Ti–6Al–4V in elevated temperature air environment, 332

Particle impact
visualization of surface waves propagating over surfaces eroded due to particle impact, 78
impact fracture thresholds in brittle solids, 99
comparisons between "sand blast" and "centripetal effect accelerator" type erosion testers, 168
new parameters in erosion for study of bulk materials and coatings, 210
modelling the influence of surface oxidation on high temperature erosion, 284
a comparison of particle impact in gas–solid and liquid–solid erosion, 465
depassivation and repassivation of AISI321 stainless steel surface during solid particle impact in 10% H_2SO_4 solution, 562
Particulate impact
particulate impact damage predictions, 35
Passivation
depassivation and repassivation of AISI321 stainless steel surface during solid particle impact in 10% H_2SO_4 solution, 562
Petroleum production
erosion of material used in petroleum production, 493
Piezoelectric polymer
a study of pressures and erosion produced by collapsing cavitation, 425
Plastic ratchetting
plastic ratchetting as a mechanism of erosive wear, 86
Plastic strain
measurements of plastic strain below an indentation and piling-up between two adjacent indentations, 50
Platelets
plastic ratchetting as a mechanism of erosive wear, 86
Power stations
the design of an apparatus to test wear of boiler tubes, 266
Pressure detector
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437
Pressure sensor
a study of pressures and erosion produced by collapsing cavitation, 425
Pulverised fuel
the design of an apparatus to test wear of boiler tubes, 266
Pumps
a study of the erosion–corrosion behaviour of engineering steels for marine pumping applications, 497

Rain
particulate impact damage predictions, 35
waterdrop impact modeling, 341
a discussion of rain erosion testing at the United States Air Force rain erosion test facility, 384
liquid-jet impact on liquid and solid surfaces, 388
Refractories
erosion testing of refractories—a new testing procedure, 215
Reynolds equation
classification of lubricants according to cavitation criteria, 444

Sand
sand erosion of wear-resistant materials: Erosion in choke valves, 179
erosion of material used in petroleum production, 493
erosion and corrosion properties of WC coatings and duplex stainless steel in sand-containing synthetic sea water, 508
Sand blast erosion tester
comparisons between "sand blast" and "centripetal effect accelerator" type erosion testers, 168
Scale exfoliation
a generalized description of the simultaneous processes of scale growth by high-temperature oxidation and removal by erosive impact, 230
Sea water
erosion and corrosion properties of WC coatings and duplex stainless steel in sand-containing synthetic sea water, 508
Shakedown theorem
plastic ratchetting as a mechanism of erosive wear, 86
Shock waves
the measurement of impact pressure and solid surface response in liquid–solid impact up to hypersonic range, 352
Silicon
a study of the mechanisms of erosion in silicon single crystals using Hertzian fracture tests, 105
Slip
a fundamental study of cavitation erosion using a magnesium oxide single crystal (intensity and distribution of bubble collapse impact loads), 437
Slurries
impact angle, particle energy and mass loss in erosion by dilute slurries, 454
Slurry
slurry erosion properties of ceramic coatings and functionally gradient materials, 473
slurry erosion behaviour of thermally sprayed WC–M coatings, 480
the influence of corrosion on the erosion of aluminium by aqueous silica slurries, 515
the synergistic effect between erosion and corrosion in acidic slurry medium, 555
the influence of applied potential on the erosion–corrosion behavior of AISI321 stainless steel in acidic slurry medium, 568
Soil layers
investigation of erosion processes as cleaning mechanisms in the removal of thin deposited soils, 413
Solid particles
a study of solid particle failure under normal and oblique impact, 92
the solid particle erosion of metallic materials: The rationalization of the influence of material variables, 129
wear of hardfacing white cast irons by solid particle erosion, 150
Stainless steels
abrasion–corrosion studies of passive stainless steels in acidic media: combination of acoustic emission and electrochemical techniques, 533
Steam
erosion behaviour and mechanisms for steam turbine rotor blades, 395

Steel
erosion of 316 stainless steel by dicalcium phosphate, 145
erosion–corrosion of carbon steel by products of coal combustion, 256
wastage of low alloy steels in a fluidized bed environment, 306
erosion–corrosion of mild steel in a temperature gradient, 316
a study of the erosion–corrosion behaviour of engineering steels for marine pumping applications, 497
erosion and corrosion properties of WC coatings and duplex stainless steel in sand-containing synthetic sea water, 508
the synergistic effect between erosion and corrosion in acidic slurry medium, 555
depassivation and repassivation of AISI321 stainless steel surface during solid particle impact in 10% H_2SO_4 solution, 562
the influence of applied potential on the erosion–corrosion behavior of AISI321 stainless steel in acidic slurry medium, 568
Stress
measurements of plastic strain below an indentation and piling-up between two adjacent indentations, 50
Sulphidation
the erosion–corrosion of alloys under oxidizing–sulphidizing conditions at high temperature, 291
Sulphuric acid
abrasion–corrosion studies of passive stainless steels in acidic media: combination of acoustic emission and electrochemical techniques, 533
depassivation and repassivation of AISI321 stainless steel surface during solid particle impact in 10% H_2SO_4 solution, 562
Superalloys
high-temperature erosion resistance of coatings for use in turbomachinery, 224
Surface features
the development of surface features on nickel during erosion–corrosion, 56
Surface treatment
coatings and surface treatments for protection against low-velocity erosion–corrosion in fluidized beds, 238
Surface waves
visualization of surface waves propagating over surfaces eroded due to particle impact, 78
Suspension flow duct
numerical prediction of erosion for suspension flow duct, 203
Synergism
the synergistic effect between erosion and corrosion in acidic slurry medium, 555

Temperature gradient
erosion–corrosion of mild steel in a temperature gradient, 316
Thermal spray coatings
slurry erosion behaviour of thermally sprayed WC–M coatings, 480
combating severe fluid erosion and corrosion of drill bits using thermal spray coatings, 487
Ti–6Al–4V
erosion–corrosion of Ti–6Al–4V in elevated temperature air environment, 332
water droplet erosion of laser surface treated Ti–6Al–4V, 360
water droplet erosion and microstructure of laser-nitrided Ti–6Al–4V, 368
TiN
the influence of substrate material on the erosion resistance of TiN coated tool steels, 189
Titanium
the solid particle and cavitation erosion of titanium aluminide intermetallic alloys, 123
Tool steel
the influence of substrate material on the erosion resistance of TiN coated tool steels, 189
Tungsten carbide
the effects of angle of impact and material properties on the erosion rates of ceramics, 117
erosion in choke valves—oil and gas industry applications, 401
slurry erosion behaviour of thermally sprayed WC–M coatings, 480
Turbine blades
a new model for steam turbine blade materials erosion, 421
Turbine rotor blades
erosion behaviour and mechanisms for steam turbine rotor blades, 395
Turbomachinery
high-temperature erosion resistance of coatings for use in turbomachinery, 224
Two-phase flow
erosion–corrosion damage of aluminum alloy in a high-speed, high-temperature, two-phase flow, 573

Waspaloy
high-temperature erosion of Haynes and Waspaloy: effect of temperature and erosion mechanisms, 299
Wastage
practical experience with wastage at elevated temperatures in coal combustion systems, 11
interpretation of wastage mechanisms of materials exposed to elevated temperature erosion–corrosion using erosion–corrosion maps and computer graphics, 273
wastage of low alloy steels in a fluidized bed environment, 306
the circumferential distribution of wastage on in-bed tubes in fluidized bed combustors, 325
Water droplets
waterdrop impact modeling, 341
water droplet erosion of laser surface treated Ti–6Al–4V, 360
water droplet erosion and microstructure of laser-nitrided Ti–6Al–4V, 368
Water taps
erosion–corrosion tests on copper alloys for water tap use, 548
WC coatings
erosion and corrosion properties of WC coatings and duplex stainless steel in sand-containing synthetic sea water, 508
Wear
grain-size dependence of the wear of alumina, 45
Wear-resistant materials
sand erosion of wear-resistant materials: Erosion in choke valves, 179
Windows
particulate impact damage predictions, 35
solid particle erosion of IR-transmitting materials and diamond composites, 195
the liquid impact resistance of a range of IR-transparent materials, 375
